The symbol of Expo '67, Buckminster Fuller's sphere is a landmark in the history of contemporary architecture and the most important building of its kind in the world. Its structure reproduces more than 97% of a sphere (62.8 metres in height and 76.2 metres in diameter).

The original structure was covered with 1,900 transparent acrylic panels.

The building's complete transparency created an almost invisible barrier between the inside and the outside. In 1976, while the structure was being repaired, a fire broke out and completely destroyed the acrylic skin. Only the tubular frame remained intact.

The outer shell of the Biosphère was awarded to Buckminster Fuller (1895-1983), who called himself a "comprehensive anticipatory design scientist", but the design of the US pavilion's inner structure was given to Cambridge Seven Associates Inc., a group of Harvard University architecture and design professors.

The original inner structure consisted of four large platforms divided into seven levels and connected by escalators, bridges and elevators. During Expo '67, the gigantic structure included a 37.5-metre (123-foot) escalator. The longest escalator ever built, it was the equivalent of eight floors.

In 1990, Environment Canada signed an agreement with the City of Montreal to convert the structure into a site devoted to eco-action. Montreal architect Éric Gauthier won an architectural competition and was commissioned to convert the interior structure in keeping with the original design, in line with Fuller's avant-garde philosophy: seeking maximum efficiency for minimum effort.

Since its opening in 1995, Environment Canada's Biosphère has been a showcase for environmental education. As an Environment Museum, the Biosphère raises the awareness of young people and their families, and the general public about major environmental issues, including those related to water and climate change, and the sustainable development, through exhibitions, interactive activities and multimedia presentations.

WELCOME TO ICSA2010

Although Architecture and Structural Engineering have both had their own historical development, their interaction has led to the many fascinating and delightful existing structures nowadays. However, there is still the need to stimulate the creative and original design of architectural structures and to persuade architects and structural engineers to further collaborate in this process and to take advantage of constructive principles and aesthetic and static values jointly. Therefore, it was considered appropriate to bring together all of the very best work that has been carried out in the field of structures and architecture during the First International Conference on Structures and Architecture (ICSA2010), held in Guimarães, Portugal, July, 21-23, 2010.

ICSA2010 covered all major aspects of structures and architecture, including comprehension of complex forms, computer and experimental methods, concrete and masonry structures, emerging technologies, glass structures, innovative architectural and structural design, lightweight and membrane structures, special structures, steel and composite structures, the borderline between architecture and structural engineering, the history of the relationship between architects and structural engineers, the tectonic of new solutions, the use of new materials and timber structures, among others.

Structures and Architecture contains the lectures and papers presented at ICSA2010. It consists of a book of abstracts and a CD-ROM containing the full texts of the lectures and papers presented at ICSA2010, including the 8 keynote lectures and 249 selected contributions from more than 40 countries.

On behalf of ICSA2010, the chair of the Conference would like to take this opportunity to express his most sincere gratitude to the authors, organizers of mini-symposia and special-seminar to the participants for their contributions, to the members of the Conference Scientific Committee for their work and commitment and to the members of the Local Organizing Committee for the time and effort they have dedicated to make ICSA2010 a successful event.

Last, but not least, our sincere thanks to all the sponsors of ICSA2010, for their willingness to embrace this event from its very beginning.

Paulo J. S. Cruz

GENERAL INFORMATION

The ICSA2010 will be held at the Convention Centre of the University of Minho - Campus of Azurém, Guimarães, Portugal.

The city of Guimarães is like no other city in Portugal. Its past is so intimately intertwined with the History of Portugal that it is commonly and proudly referred to as the Cradle of the Nation.

The Historic Centre of Guimarães has remained basically unchanged since the 15th century and was declared a World Heritage Site in 2001 by UNESCO, due to its Middle Age historical monuments. Guimarães was chosen by the Portuguese government to be the European Capital of Culture in 2012.

PROCEEDINGS

The book of abstracts and a CD-ROM will be distributed with registration's materials at the Conference.

SCHEDULE

Onsite registration fees are:

600€ - Authors and participants

300€ - Students

250€ - Accompanying Persons

The registration fees includes: Conference attendance, the Book of Abstracts and the CD-ROM Proceedings, coffee-breaks, gala-diner (except for students) and welcome reception.

OPENING CEREMONY

Time: Wednesday, July 21, 9:00 – 9:30

Place: Main Auditorium

CLOSING CEREMONY

Time: Friday, July 23, 18:30 – 19:00

Place: Main Auditorium

KEYNOTE LECTURES

Ian Ritchie, Ian Ritchie Architects Ltd, London, England

“Architectural values, altruism and innovation in a changing world”

(Wednesday, July 21, Main Auditorium)

Julio Martínez Calzón, MC2, Madrid-Spain

“Treatment of the form in structural engineering”

(Wednesday, July 21, Main Auditorium)

Bjørn N. Sandaker, Oslo School of Architecture and Design, Oslo, Norway

“An ontology of structured space”

(Thursday, July 22, Main Auditorium)

António Reis, Technical University of Lisbon / GRID, Lisbon, Portugal

“The architecture of special structures”

(Thursday, July 22, Main Auditorium)

Yves Weinand, EPFL, Lausanne, Switzerland

/ Bureau d'études Weinand, Liège, Belgium

“Innovative timber constructions”

(Thursday, July 22, Main Auditorium)

Angus MacDonald, School of Arts, Culture and Environment, Edinburgh, Scotland

“The changing relationship between architects and structural engineers”

(Friday, July 23, Main Auditorium)

André Tavares, University of Minho, Guimarães, Portugal

“Concrete immaterial structures”

(Friday, July 23, Main Auditorium)

Robert Off, Anhalt University of Applied Sciences

/ I.M.S .e.V, Bobingen, Germany

“New trends on membrane and shell structures

– Examples of bat-sail and cushion-belt technologies”

(Friday, July 23, Main Auditorium)

ICSA2010 SPECIAL SEMINAR

ThM, ThA & ThE - 1

Megastructures - Architecture_Play_Structure

The seminar will focus on some megastructural proposals, designed in the 60s and 70s of the twentieth century, in order to discuss the social and cultural context that stimulated, then, a playful and expressive relationship between Architecture and Structure: from quotidian experience to radical utopia. In this sense, the symposium will not only count on the testimony of notorious authors of some of those proposals (Gian Piero Frassinelli, Dennis Crompton, Fumihiko Maki and Yona Friedman), but also on the vision of important researchers lately specialized on the matter (Mary Louise Lobsinger, Dominique Rouillard, Paul E. Kassabian and Simon Sadler).

Coordinated by:

Nuno Grande

Department of Architecture, University of Coimbra, Portugal;

Pedro Bandeira

School of Architecture, University of Minho, Portugal.

ICSA2010 MINI-SYMPOSIA

WeM 1, WeA 1 & WeE 1

**Mini-Symposium on “Tectonics” in Architecture:
Between Aesthetics and Ethics**

The mini-symposium will provide a forum for the presentation of fundamental, theoretical, and practical aspects of the art of building, focusing the attention on the relations among mechanics, mathematics, structural and architectural design. The symposium is expected to bring together researchers (architects, engineers, mathematicians) for dealing with the influence of the scientific and technical knowledges on the architectonic culture, in order to underline the role played by the structural conception in designing processes during the centuries. The symposium will also discuss developments concerning the importance of the Vitruvean *firmitas*, pointing out the risks arising when the structural instances are neglected.

Although not limited to those topics the content of sessions will emphasise the following themes: theoretical issues; calculus and algorithms in architecture; various approaches to structural complexity.

Coordinated by:

Patrizia Trovalusci & Lucio Valerio Barbera
Sapienza University of Rome, Rome, Italy.

WeM 2, WeA 2 & WeE 2:

Mini-Symposium on Transparent Structural Materials - Glass and Plastic

The use of glass and transparent plastic material in modern architecture continues to gain in importance. To combine architectural and structural demands they can be used as structural elements. Therefore it is very important to know the detailed mechanical behaviour of the materials and to explore appropriate joining technologies. Based on this knowledge architectural planning and structural design can be merged. Composite elements and hybrid structures that consist of transparent and conventional building materials can also play an important role in the design of architectural structures.

The design parameters and methods for the successful use of transparent thermoplastics and glass can be presented in this Mini Symposium as well as their connections and detailing. The presentation can also includes life cycle and safety considerations.

Coordinated by:

Johann-Dietrich Wörner
University of Darmstadt, German Aerospace Center, Germany
Konrad Bergmeister
University of Natural Resources and Applied Life Sciences,
Vienna, Austria
Jens Schneider
University of Darmstadt, Germany

FrM 1, FrA 1 & FrE 1

Mini-Symposium on Timber Construction

The mini-symposium will address contemporary and emerging issues related to using timber as a construction material that suits the needs of 21st century societies. Although not limited to those topics the content of sessions will emphasise the following themes: use of timber in tall buildings; cross-laminated-timber - a new design principle and modelling the performance of timber structures.

Coordinated by:

Ian Smith
University of New Brunswick, Canada
Gerhard Schickhofer & Thomas Bögensperger
Graz University of Technology, Institute for Timber Engineering and
Wood Technology, Austria
Jochen Köhler
Swiss Federal Institute of Technology ETH, Switzerland.

PRESENTATION GUIDELINES

The presentations should take 15 minutes plus 5 minutes for audience questions. This schedule will be strictly enforced.

Each paper session will be attended by a chairman, responsible for monitoring the time and enlightening the author, through a signal, once there are 5 minutes left to the end of the presentation.

Personal Computer (MS Windows) with Power Point will be available at each Session room.

No personal computers will be allowed to connect to the LCD projector to make presentations.

Please make sure to bring your presentation not only on USB-stick but also on CD-ROM (floppy disks cannot be used!).

Authors are requested to provide their presentation files at the Conference Desk. Please make sure no Asian fonts are used or, if those fonts are necessary, all fonts are embedded in the Power Point file.

All speakers are kindly requested to strictly observe the allocated presentation time.

SOCIAL PROGRAM

The social program includes:

Welcome Reception

Tuesday, July 20, 20:00 - Alberto Sampaio Museum

This museum was created in 1928 to house the collections of the Chapter House of N. S. da Oliveira and other churches and convents in the Guimarães region.

It is settled in a historical centre that is patrimony of the humanity, where, in the 10th C., the countess Mumadona ordered the building of a monastery. In the 11th C. that monastery was replaced by a college, under the invocation of St. Mary's and later under the invocation of Our Lady of the Olive Tree.

The Alberto Sampaio Museum holds collections of great interest from which the sculpture collection, represented by limestone and wooden statues from the 13th C. up to the 18th C. are part of. The goldsmithery collection composed of liturgical utensils - cups, patens, custodies, crosses and reliquaries - of varied typology and functions, which give the visitor the opportunity to keep track of evolution and likings, from the beginnings of the 12th C. to the end of the 19th C.

Gala Dinner

Thursday, July 22, 20:00 - Municipal Stadium, Braga

The Braga Municipal Stadium is a football stadium built in 2003 as the new home for local club SC Braga, and as a 2004 UEFA European Football Championship venue. Designed by the Portuguese architect Eduardo Souto de Moura, it is often considered one the most original and beautiful stadiums in the world. The Financial Times, states that: "There has been nothing in this country to match the architectural delight of Eduardo Souto de Moura's stadium for Braga in Portugal, a breathtaking arena carved into the side of a rock face on the site of a former quarry."

Featuring **Banda Plástica de Barcelos** - A Portuguese Folk Band created in 1976. We can find an obvious resemblance between the elements of the band and the handicraft above dolls from Barcelos - and **Tuna Académica do Minho** - A University Tuna is a musical group made up of university students. Tuna Académica do Minho was created in 1990. As far as the music is concerned, the main instruments used are the guitar, mandolin, the bandurria and the tambourine.

All registered participants and accompanying persons are welcome to the Welcome Reception and Gala Dinner.

Registration as 'Student' does not include the gala dinner. Additional tickets for Gala Dinner for registrants with student fee are available through the registration desk (96.00 €)

ACCOMPANYING PERSON'S PROGRAM

1) Guimarães

(half day) - July 21st

Visit to one of the most beautiful and historical cities of Portugal, Guimarães - the Nation's birthplace.

Surrounded by parks and a 15th century Palace, stands the Castle of Guimarães, which will be our first stop. Simple, but yet a remarkable site, a place full of story. It was here that D. Afonso Henriques was born in the 12th century from the Count

Henrique and his wife D. Teresa. The future king was baptized in the Romanesque chapel of São Miguel outside the castle gates and close to the Ducal Palace.

Continuing with a visit to the 15th century Palace of the Dukes of Bragança, a massive and imposing building with distinctive turrets and brick chimneys. It was built in 1401 by the first Duke of Bragança and rehabilitated in the last century.

The tour proceeds for a guided visit to the historic centre of Guimarães classified as World Heritage by UNESCO, with its medieval streets layout which is lined with historic buildings everywhere you look. Stop at Largo da Oliveira one of the central points. Free time for a calm stroll.

2) Braga and Barcelos

(full day) - July 22nd

Departure from Guimarães for a visit to Braga, probably the main religious center in the country, Braga is known for its baroque churches, magnificent 18th century houses and elaborate gardens and squares. Known, in the Roman era as "Bracara Augusta".

This visit will provide the general idea of the most important religious and architectural monuments, such as the Sé, the most impressive church which has several styles, from Roman to Baroque. Panoramic visit passing through the City Hall, the Palace of "Raio", the Convent of "Populo", and visit to "Bom Jesus" do Monte (by funicular).

Free time at Bom Jesus do Monte and Lunch on a Restaurant with a panoramic view over Braga.

After lunch the tour proceeds to Barcelos - one of the most emblematic cities of popular Minho art. On your stroll around Barcelos you will find the 18th-century churches of Bom Jesus da Cruz and Nossa Senhora do Terço. Also opportunity for a visit to the Ceramics Museum. On the Handicraft Centre, you can get a good general view of Minho arts and crafts. The brightly-coloured Barcelos Cock is the most representative of all the pieces produced here, but one should not forget the brass bands and the figures depicting the region's customs and habits. Return to Guimarães.

3) Ponte de Lima and Viana do Castelo

(full day) - July 23rd

Visit to Ponte de Lima a Portuguese village with its medieval architecture and surrounded by a beautiful green area.

Ponte de Lima has a beauty and very specific and natural environment. It is situated in the middle of the Ribeira of Lima valley. In the Middle Age it was a fortified village with walls 600 meters long, 10 towers, 2 turrets and 6 entrances. In 1995 Ponte de Lima won the European Grand Prize of Tourism and Environment.

We will then proceed to the town of Viana do Castelo, a XII century town (founded 1258), where the modern town has grown near the river Lima. We can visit the Cathedral and you can't miss the neo-Byzantine Church of Santa Luzia, located on top of the Santa Luzia hill with a breathtaking view of Viana do Castelo, the river Lima estuary and the sea. The city is a living museum, but it is also the capital of the rich Minho folklore, with an important handicraft industry.

Free time for lunch on the city center. We can also visit the shipyards at Viana do Castelo in activity since 1944, being the major Portuguese Shipbuilder (to be confirmed). Return to Guimarães.

Tuesday, July 20, 2010

15:00 – 19:00 Registration (Lobby of the Main Auditorium)

20:00 Welcome Reception (Alberto Sampaio Museum - Guimarães)

Wednesday Morning (WeM), July 21, 2010

8:00-9:00 Registration (Lobby of the Main Auditorium)

9:00-9:30 Opening Ceremony (Main Auditorium)

Keynote Lectures (Main Auditorium) Ian Ritchie: Architectural values, altruism and innovation in a changing world

Julio Martínez Calzón: Treatment of the form in structural engineering

Chairman: F. Branco

Coffee Break (Lobby of the Main Auditorium)

Concurrent Technical Sessions: WeM 1 to WeM 5

WeM 1 – Main Auditorium

Mini-symposium
“Tectonics” in Architecture: Between Aesthetics and Ethics (1): The arena

Chairman: P. Trovalusci
The morphogenesis of shell structures: a conceptual, computational and constructional challenge

M.A. Chiarini & M. Sassone

Topology Optimization in Architecture May It Be a Design Tool?
L. Frattari, R. Yadori, R. D'Aria & G. Leoni

On the optimal design of shape resistant structures
L. Consolini, G. Delta Puppa & S. Lenci

Structural optimization vs. shape design
P. Trovalusci & A. Tinelli

Geometrical indeterminacy as a way to structural and architectural performance
C. Padua-Schioppa & S. Pollak

Shear behaviour of point fixed glass panels used for building stabilization
D. Maciobik, M. Crisinel & J.P. Lebet

Concept, testing and realisation of transparent and sustainable glass double layer grids
B. Weller, S. Reich & J. Ebert

Elastic strain energy and failure behaviour of glass elements
F. Bos

Two spectacular facades with corrugated glass in Porto and Antwerp and an all glass cube in Haarlem (NL)
R. Nijssse

15:00 – 19:00 Registration (Lobby of the Main Auditorium)
20:00 Welcome Reception (Alberto Sampaio Museum - Guimarães)

8:00-9:00 Registration (Lobby of the Main Auditorium)	8:00-9:00 Registration (Lobby of the Main Auditorium)	8:00-9:00 Registration (Lobby of the Main Auditorium)	8:00-9:00 Registration (Lobby of the Main Auditorium)	8:00-9:00 Registration (Lobby of the Main Auditorium)	8:00-9:00 Registration (Lobby of the Main Auditorium)	8:00-9:00 Registration (Lobby of the Main Auditorium)	8:00-9:00 Registration (Lobby of the Main Auditorium)	8:00-9:00 Registration (Lobby of the Main Auditorium)	8:00-9:00 Registration (Lobby of the Main Auditorium)

Canadian Museum for Human Rights, Winnipeg <i>B. Charnish & N. Erajkovic</i>	Heysel canopy <i>E. Castro e Costa</i>
Following natural patterns to unite architecture and structure <i>P. Shirazpour, G. Yunesi & S. Yaghmaeian</i>	Narrative structures <i>E. Castro e Costa</i>
Structural design process of the doubly curved Heysel canopy <i>K. Verbeeck & L. Ney</i>	Structural design process of the doubly curved Heysel canopy <i>K. Verbeeck & L. Ney</i>

Wednesday Evening (WeE), July 21, 2010

16:30 – 17:00 Coffee Break (Lobby of the Main Auditorium)

Concurrent Technical Sessions: WeE 1 to WeE 5

WeE 1 – Main Auditorium

Chairman: M.A. Chirino	"Tectonics" in Architecture: Between Aesthetics and Ethics (3): Theoretical issues and ideas for future developments <i>G. Rega & V. Settimi</i>

WeE 2 – Room B1.14

Chairman: J. Schneider	Mini-symposium Transparent Structural Materials - Glass and Plastic (3): Hybrids <i>J. D. Wörner</i>
Chairman: M.A. Chirino	Nonlinearity in architecture versus science: borrowing the lexicon of complexity or exploiting its powerfulness? <i>P. Trovalusci & R. Panai</i>
Chairman: G. Rega	Towards an ethic of construction: the structural conception and the influence of mathematical language in architectural design <i>P. Trovalusci & R. Panai</i>
Chairman: C. Gamboni	Structural design in the architectural design process: Toyo Ito. <i>L. Frattari, R. Vadovi & R. D'Arpa</i>
Chairman: Z. Nagy	An eco-design-oriented multidisciplinary approach in industrial design <i>Z. Nagy, C. Câmpian, M. Cristiutiu & I. Benke</i>

WeE 3 – Room B1.15

Chairman: O. Pons	Steel Structures (3) <i>P. Casariego, M. Casafont, M. Ferrer & F. Marimón</i>
Chairman: H.M. Ruffo	Carrasco International Airport. Architects, engineers and steel structure <i>H.M. Ruffo & J. Gomez</i>
Chairman: A. Berk	Design of cold-formed steel curved panels <i>M.T. Rodríguez-León, F. Escrig-Pallarés & J. Sánchez-Sánchez</i>
Chairman: J.B. Davison	High-performance laminated glass for structural efficient glazing <i>I. Stelzer</i>
Chairman: R. Popovic-Larsen	Scaling up SentryGlas-laminated reinforced glass beams <i>P.C. Louter, J. Bellis & F.A. Veer</i>
Chairman: R. Rapaport	Hybrid structural elements made of glass and polycarbonate <i>B. Weiller & K. Härtth</i>
Chairman: M. Komuro	Adhesively bonded hybrid steel-glass beams <i>M. Netusil & M. Eliásova</i>
Chairman: Z. Nagy	Development of a super slim façade system for in Holland Polytechnic, Delft <i>M. Eekhout & P. van de Rotten</i>

WeE 4 – Room B1.16

Chairman: B. Sandaker	Interdisciplinary Work & Educating Architects and Structural Engineers (1) <i>S.G. Reid</i>
Chairman: A. Berk	Teaching structures to architecture students: Examples from bridge design <i>A. Berk & A.I. Unay</i>
Chairman: T. Molnár	Structural robustness as an innovative design concept <i>M. Sykora & M. Holicky</i>
Chairman: M. Sassone	On deployable reciprocal frames: from the mathematical description to the architectural applications <i>M. Sassone & D. Parigi</i>
Chairman: R. Corrao	Early Christian Cemetery Complex Sopianae/Pécs Hungary <i>R. Corrao & L. Pastore</i>

WeE 5 – Room B1.17

Chairman: D. Mocibob	Innovative Architectural and Structural Design (3) <i>K. Verbeeck & L. Ney</i>
Chairman: S.G. Reid	Structural design procedures to support the development of innovative architectural structures <i>S.G. Reid</i>
Chairman: A. Berk	Structural robustness as an innovative design concept <i>M. Sykora & M. Holicky</i>
Chairman: M. Sassone	On deployable reciprocal frames: from the mathematical description to the architectural applications <i>M. Sassone & D. Parigi</i>
Chairman: R. Corrao	Early Christian Cemetery Complex Sopianae/Pécs Hungary <i>R. Corrao & L. Pastore</i>

Thursday Morning (ThM), July 22, 2010

Registration (Lobby of the Main Auditorium)

Keynote Lectures (Main Auditorium) **Bjørn N. Sandaker:** An ontology of structured space
António Reis: The architecture of special structures
Yves Weinand: Innovative timber constructions

Chairman: J. Martínez Calzón

Coffee Break (Lobby of the Main Auditorium)

Concurrent Technical Sessions: ThM 2 to ThM 5

10:30 – 13:30 Special Seminar: ThM 1

ThM 1 – Main Auditorium

ThM 2 – Room B1.14

ThM 3 – Room B1.15

ThM 4 – Room B1.16

ThM 5 – Room B1.17

ThM 6 – Room B1.13

Special Seminar Megastuctures: Architecture_Play_Structure (1)	Tall Buildings	Tectonics	Timber Structures (1)	Interdisciplinary Work & Educating Architects and Structural Engineers (2)	Steel Structures (4)
Chairmen: N. Grande & P. Bandeira <i>The Seminar will debate some megastuctural proposals, designed in the 60s and 70s, in order to discuss the social and cultural context and the playful relationship between Architecture and Structure</i>	Chairman: A. Reis <i>Structures and architecture in tall buildings K.S. Moon</i>	Chairman: V. Riso <i>Tectonic structures, platforms and clouds J.J. Ferrer-Frés</i>	Chairman: E. Karacabeyli <i>Structural timber fabric: Textile principles on building scale M. Hudert & Y. Weinand</i>	Chairman: A. Macdonald <i>Collaborative teaching to create integrated building envelopes K. Dong & J. Doerfler</i>	Chairman: M. Crisinel <i>Reliability assessment of industrial heritage structures and application to a light-weight steel roof M. Sykora, M. Holicky, K. Jung, J. Markova, K. Kvaal & T.K. Thiijs</i>
Dennis Crompton <i>(Archigram)</i>	Torre Reforma – an innovative tower design in Mexico City D.N. Grant, R. Pittella, M. Tavolaro & I. Kourakis	Performative Tectonics M.K. Hoist, P.H. Kirkegaard & M. Mullins	Improving the system of floor slabs of Tji beams with the incorporation of a decorative ceiling finish M.C. Fernández-Cabó	Get the form Right! Teaching structural design to architects R. J. Dermody	Robustness performance of seismic resistant building frames under abnormal loads F. Dimu, D. Dubina & A. Ciutina
Gian Piero Frassinelli <i>(Superstudio)</i>	Zerozero tower for the new Telefónica headquarters in Barcelona J. Martínez-Calzón & L. Cerrián	Tectonic theory and practice: interiority in the future prefab home M. Frier, A.M. Fisker & P.H. Kirkegaard	Case study of a large lattice truss timber structure of an industrial building C. Molins	An equilibrium approach on a structural scale to structural design D. Zástavni	Elasto-plastic FE analysis on hysteretic moment-rotation behavior of top- and seat-angle connections N. Kishi, M. Komuro & W.F. Chen
Fumihiko Maki <i>(Japanese Metabolist)</i>	Optimum design of steel diagrid structures for tall buildings K.S. Moon	On detailing in contemporary architecture - a discussion of architectural quality C. Kristensen & P.H. Kirkegaard	The use of structural timber in designing sustainable rainscreen facades K. Vasiliou	The interdisciplinary design studio: Understanding collaboration K. Dong & J. Doerfler	Mechanical behaviour of a ferritic stainless steel under simple and complex loading paths B. Rossi & J.-P. Jaspert
Yona Friedman <i>(Ville Spatiale)</i>	Residential and tertiary complex “La Pallaresa” in Barcelona J. Martínez-Calzón & B. Ballesteros	Nature and structural design in architecture A. Davico & P. Mendonça	Structural assessment and reinforcement of ancient timber trusses M. Esteban, F. Arriaga, G. Jiménez & I. Bobadilla	Updating the architectural and engineering curricula for the integrated age P. Kassabian & A. Watson	Analysis of some selected types of joints in lattice structures V. Kvocák, P. Béke & N. Hocová
Debate					“Affordable Houses: Architectural concepts of a modular steel residential house” V. Muritinho, A. Correia, H. Ferreira, L. Simões da Silva, H. Gervásio, C. Rebelo, A. Santiago, P. Santos, D. Mateus & C. Rigueiro

After the conference a short book on Megastuctures will be published, as a testimony of this memorable meeting between architects and architectural researchers

Thursday Afternoon (ThA), July 22, 2010

12:30 – 14:00 14:00 – 16:00 15:00 – 16:00	Lunch (Restaurant of the University) Concurrent Technical Sessions: ThA 2 to ThA 5 Special Seminar: ThA 1	ThA 1 – Main Auditorium	ThA 2 – Room B1.14	ThA 3 – Room B1.15	ThA 4 – Room B1.16	ThA 5 – Room B1.17
Special Seminar Megastructures: Architecture_Play_Structure (2) Chairmen: N. Grande & P. Bandeira	Bridges (1) Chairman: A. Nussbaumer <i>The seminar will debate some megastructural proposals, designed in the 60s and 70s, in order to discuss the social and cultural context and the playful relationship between Architecture and Structure</i>	Bridges (1) Chairman: R. Off <i>Designing bridges: structure, architectural concept and aesthetics</i> A. Adão da Fonseca	Membranes and Tensile Structures Chairman: R. Off <i>'Membranes' in light weight and membrane structures</i> S. Patil & S. Lele	Timber Structures (2) Chairman: M. Piazza <i>New joint design for the improvement of steel rods glued-in timber using an adhesive bulb</i> J. Estévez, D. Otero, E. Martín & J.A. Vázquez	Affordable Houses and Sustainable Buildings Chairman: K. Nyhre <i>Design strategies for structure as in integrating framework</i> H. Giles	Affordable Houses (Part II); Functional, structural and technological performance P. Santos, D. Mateus, L. Simões da Silva, C. Rebelo, H. Gervásio, A. Correia, H. Ferreira, A. Santiago, V. Murinho & C. Rigueiro
Dominique Rouillard (Cedric Price's Fun Palace)	Bridges: Architecture or just aesthetics? J. Tervoja	Low-span lightweight membranes in housing - environmental and structural potentialities P. Mendonça	Constantino de Vasconcelos and quincha architecture in Spanish Colonial Peru H. Rodríguez-Camilloni	Innovative sustainable steel framing based affordable house solution for continental seismic areas D. Dubina, V. Ungureanu, A. Ciutina, M. Mutiu & D. Grecea	Barriers to the implementation of sustainable structural materials in green buildings C. Griffin, C. Knowles, C. Theodoropoulos & J.H. Allen	Assessment of seismic behaviour of traditional timber frame Ottoman Houses: Frame tests Y.D. Aktaş Erdem, U. Akyüz, B. Erdil, A. Türür & N. Şahin Güçhan
Marie-Thérèse Stauffer (Archizoom)	To be or to do; a study of architects' and engineers' contributions to bridge design B. Manum & B.N. Sandaker	Natrix, barrier of silence A.P.H.W. Habraken	'Cables' in light weight and membrane structures S. Patil & S. Lele	Modelling of multi layer beam with inter-layer slips J. Natterer & Y. Weinand	Numerical analysis of metal joints glued in timber pieces E. Martín-Gutiérrez, J. Estévez, D. Otero & J.A. Vázquez	Comparing the embodied energy of structural systems in buildings C. Griffin, B. Reed & S. Hsu
	<i>After the conference a short book on Megastuctures will be published, as a testimony of this memorable meeting between architects and architectural researchers</i>	Challenges of bridge design and construction in urban areas V. Seliverstov & O.I. Chemerinsky				
		Tensile structures: design process E.F. Nunes & J.B.M. Sousa-Junior				

Thursday Evening (ThE), July 22, 2010

16:00 – 16:30 Coffee Break (Lobby of the Main Auditorium)

Concurrent Technical Sessions: ThE 1 to ThE 5

Special Seminar: ThE 1

ThE 1 – Main Auditorium

ThE 2 – Room B1.14

ThE 3 – Room B1.15

ThE 4 – Room B1.16

ThE 5 – Room B1.17

Special Seminar Megastuctures: Architecture Play Structure (3)

Chairmen: N. Grande & P. Bandeira

The seminar will debate some megastructural proposals, designed in the 60s and 70s, in order to discuss the social and cultural context and the playful relationship between Architecture and Structure

Paul E. Kassabian
(Buckminster Fuller's Geodesic Structures)

The relation between architectural elements and structural system in the rehabilitation of the old bridges in Timisoara

L. Rosiu & S.M. Bica

Aerodynamic stability of large suspension bridge using cable frames

T. Yoshimura & M. Kawahara

Debate

Simon Sadler
(Constant's New Babylon)

Asymmetric network arch bridges

B. Zwingmann, S. Marx & F. Schanack

After the conference a short book on Megastuctures will be published, as a testimony of this memorable meeting between architects and architectural researchers

Bridges (2)

Chairman: A. Adão da Fonseca

Design evolution of footbridges and access bridge on the jetties of a LNG Terminal J.D. Gómez, N. Pastor & A. Arnedo

The behaviour of steel and steel concrete composite joints

D. Dan, V. Stoian, T. Nagy-Gyorgy, A. Fabian, C. Daescu, C. Florut & I. Demeter

Convergent design methodology for bio-science labs: architectural and performative structural considerations using the Geilinger composite column solution

M. Echard & D. Tonis

The "diagrid system": A new aesthetic and structural concept for an outstanding bridge on the access to the new T4 terminal at Barajas Airport (Madrid)

F. Millanes, D. Martínez, P. Solera, F. Domouso, L. Fernández-Ordoñez & E. Rodríguez

Oscar Niemeyer's Bridge in Brasília
R. P. da Fonseca & J.M. Morales Sanchez

Hybrid and Composite Structures

Chairman: I. Valente

Tall hybrid RC framed buildings with massive timber floor plates A. Asliz & I. Smith

Architecturally exposed hybrid wood-steel and wood-concrete structures P. Fast & J. Stahl /

The behaviour of steel and steel concrete composite joints

D. Dan, V. Stoian, T. Nagy-Gyorgy, A. Fabian, C. Daescu, C. Florut & I. Demeter

Convergent design methodology for bio-science labs: architectural and performative structural considerations using the Geilinger composite column solution

M. Echard & D. Tonis

Proposals for determination of the effective moment of inertia of composite slabs

R.S. Costa, F.C. Rodrigues & A.C.C. Lavall

Gala Dinner (Municipal Stadium - Braga)

Emerging Technologies

Chairman: P. C. Louter

Translucent buildings' silhouettes made of wire cloth - development of an adjusted dynamic wind load concept F. Kemper, M. Feldmann & J. Kuck

The emergence of kinetic intelligent architecture in 21st century H. Ghamari & M. Asefi

Structure and architectural project: two examples with masonry walls M. Freire, J.M. Rosales & G. Crecente

Seismic dissipating devices and unconventional shapes in seismic areas M. Mezzi & A. Dusi

Retrofit of the masonry minaret of historical mosque with FRP: A case study

A.M. Turk & C. Cosgun

Sustainable and earthquake resistant structural systems

E. Coskun, G. Kiymaz & E. Seckin
P. Sabin-Díaz, E.M. Blanco-Lorenzo, J.B. Pérez-Valcárcel & M. Muñoz-Vidal

Restoration of the refectory vault. Monasterio de Monfero, A Coruña, Spain
P. Sabin-Díaz, E.M. Blanco-Lorenzo, J.B. Pérez-Valcárcel & M. Muñoz-Vidal

Friday Morning (FrM), July 23, 2010

8:00-8:30 Registration (Lobby of the Main Auditorium)

Keynote Lectures (Main Auditorium) **Angus MacDonald:** The changing relationship between architects and structural engineers

Andre Tavares: Concrete immaterial structures

Robert Off: New trends on membrane and shell structures – Examples of bat-sail and cushion-beit technologies

Chairman: K. Myhre

Coffee Break (Lobby of the Main Auditorium)

Concurrent Technical Sessions: FrM 1 to FrM 5

FrM 1 – Main AuditoriumMini-symposium
Timber Construction (1): Tall Timber Buildings

Chairman: I. Smith

Better than steel? The use of timber for large and tall buildings from ancient times until the present
R. LangenbachThe Cathedral Museum of Pécs
B. BachmannDesigning a bridge, airport and stadium
J. Radić, A. Kindjj & B. KinclPushing the limits of platform frame wood construction
C. N. & M. Popovski & E. KaracabeyliDevelopment of fireproof glued-laminated timber for use in medium-rise buildings in Japan
T. Harada, D. Kamikawa, K. Miyamoto, T. Ohuchi, M. Miyabayashi, K. Ando & N. HattoriDesign guidelines for an 8-storey hybrid wood-concrete multi-family building
S. Gagnon, W. Munoz, M. Mohammad & K.D. BelowA case study of a 6-storey hybrid wood-concrete office building in Québec, Canada
S. Gagnon & S. RivestStructural design of the International Iberian Nanotechnology Laboratory
H. Marques, P. Pimenta & A. Campos e MatosPreservation of historical concrete structures and application prospect
F. Li, D.-J. Liu, J.-B. Han & J.-L. WangDouble-layer tensile grids for architectural applications: in search on new morphologies
K. Liapi & J. KimBehavior of LNG concrete tank to cryogenic temperatures
L. DammaniArtificial intelligence techniques applied to reinforced concrete
J.L. Pérez, J. Eiras, F. Martínez-Abejá & J.R. RabanalAdvantages of using raw materials in structural solutions
A.Murta, C. Teixeira, H. Varum, I. Bentés & J. PintoDamage evaluation for condition assessment of historic Masonry Structures by NDE and Monitoring
Y.D. Aktas & A. Turer

FrM 2 – Room B1.14	FrM 3 – Room B1.15	FrM 4 – Room B1.16	FrM 5 – Room B1.17
FrM 1 – Main Auditorium Mini-symposium Timber Construction (1): Tall Timber Buildings Chairman: I. Smith	Concrete Structures (1) Chairman: A. Camões Investigation the optimum location of cable-supports for communication towers O. Salem	Computer and Digital Design Tools (1) Chairman: R. Póvoas Historical use of concrete and innovation in architecture M. Bostenaru-Dan	Masonry Structures Chairman: C. Molins Nonlinear seismic assessment of architectural heritage: a study of the Árchez tower P.Pineda & A. Sáez
Better than steel? The use of timber for large and tall buildings from ancient times until the present R. Langenbach	Reinforced concrete structures. Sustainable architecture? M. Molina-Huerta	Computational design tools for integrated design M.K. Holst & P.H. Kirkegaard	Fracture test of a Gothic ribbed vault J.C. Palacios, R. Martín, J.I. Hernando, D. Sanz, M.A. Alonso, & A. Aznar
The Cathedral Museum of Pécs B. Bachmann	Spatial concrete plate structures – a fusion of architecture and structural engineering A. Gianoli & M. Kunze	Gathering the real time state of construction for simulation K. Allard & H.-J. Bagstad	The structural behavior and the state of stress in the elements of Cathedral of Sé in São Paulo K. Niccoli-Ramirez & H. Lindenberg-Neto
Designing a bridge, airport and stadium J. Radić, A. Kindjj & B. Kincl	Conservation requirements for concrete heritage. The case study of the buildings of the Fundação Calouste Gulbenkian in Lisbon J. Valença & E. Júlio	A dynamic analysis of the Ruins of St. Paul's, Macau C.C. Lam, V.P.Lu & K.P. Kou	Climate, environment and frost damage of architectural heritage S. Kyllingstad, T.K. Thiijs, A. Flø, J. Potac & M. Sykora
Pushing the limits of platform frame wood construction C. N. & M. Popovski & E. Karacabeyli	Structural design of the International Iberian Nanotechnology Laboratory H. Marques, P. Pimenta & A. Campos e Matos	Artificial intelligence techniques applied to reinforced concrete J.L. Pérez, J. Eiras, F. Martínez-Abejá & J.R. Rabanal	Advantages of using raw materials in structural solutions A.Murta, C. Teixeira, H. Varum, I. Bentés & J. Pinto
Development of fireproof glued-laminated timber for use in medium-rise buildings in Japan T. Harada, D. Kamikawa, K. Miyamoto, T. Ohuchi, M. Miyabayashi, K. Ando & N. Hattori	Preservation of historical concrete structures M. Bostenaru-Dan	Behavior of LNG concrete tank to cryogenic temperatures L. Dammani	Damage evaluation for condition assessment of historic Masonry Structures by NDE and Monitoring Y.D. Aktas & A. Turer

Friday Afternoon (FrA), July 23, 2010

13:00 – 14:00 Lunch (Restaurant of the University)

14:00 – 16:00 Concurrent Technical Sessions: FrA 1 to FrA 5

FrA 1 – Main Auditorium

Mini-symposium

Timber Construction (2): Cross Laminated Timber-A New Design Principle

Chairmen: T. Bogenberger
A.L. Rodrigues

Vertical relative displacements in a medium-rise CLT-building

E. Serrano, B. Enquist & J. Vessby

A study of cross-lamination of a multi-component liquid-retaining timber structure

N.J. Savage, A. Kermanni & H. Zhang

Verification processes for cross laminated timber in the frame of EN 1995

R.A. Joebstl

On the architectural qualities of cross laminated timber

A.K. Beijer, P.H. Kirkegaard & A.M. Fisker

Vibration properties of cross laminated timber floors

N. Labbønne & K.A. Malo

FrA 2 – Room B1.14

The Borderline Between Architecture and Structural Engineering (1)

Chairman: A. L. Rodrigues

Architect and structural engineer communicating in multi-disciplinary creativity

L. Luyten

Architectural anatomy

J. Pérez-Herreras

Technological evolution of concrete: from ancient times to ultra high performance concrete

A. Camões & R.M. Ferreira

Four study cases on skins and structures

H. Fallon

Groundwork, structure, design: the integrated education of architects and engineers

M. Dunn

Load path method in the interpretation of dome behaviour

F. Palomino & A. Totaro

Tensile structures - interdisciplinary teamwork as a win-win situation

E. Amitay & I. González-Quelle

FrA 3 – Room B1.15

Concrete Structures (2)

Chairman: S. Jalali

New solutions for constructing double-curved concrete shell structures

M. Johnson, P. Kassabian, C. Genter, M. Love, T. Love & J. Lamere

Optimization as a design tool for shell structures

S. Arnaut, G. Lombaert & G. de Roeck

Representation + fabrication: Connecting descriptions and artifacts in the digital age

T. Al-Haddad, A. Cavieres, R. Gentry, M. Carpo, J. Cho, L. Wagner & A. Zaitsev

Checking building structures

J. Valcárcel & M. Muñoz Vidal

Poor quality concrete: a major challenge in the building construction industry in Nigeria

R.O. Oduola

Hybrid composite rods for concrete reinforcement

C. Gonçalho-Pereira, R. Fangueiro, S. Jalali, M. Araújo & P. Pina-Marcos

FrA 4 – Room B1.16

Computer and Digital Design Tools (2)

Chairman: P. Mendonça

A computational framework for synthesising optimum complex structural patterns

D.J. Gunaratnam & M. Roseman

FRP composites for seismic retrofitting of RC wall panels with cut-out openings

I. Demeter, T. Nagy-György, V. Stoian, C. Daescu & D. Dan

Sintered glass with increased contents of secondary raw materials

T. Melichar & J. Bydžovský

FRP: Towards harmony between structural and architectural requirements for rehabilitation systems

S. Salib

FrA 5 – Room B1.17

Chairman: J. M. Cabredo

FRP light poles: A Combination of structural integrity and architectural elegance

S. Salib

Bond improvement in cement mortars reinforced with carbon-fibre composite strands

A. Ivanic, S. Lubaj & E. Radosavljevic

FRP light poles: A Combination of structural integrity and architectural elegance

S. Salib

Friday Evening (FrE), July 23, 2010

16:00 – 16:30 Coffee Break (Lobby of the Main Auditorium)

16:30 – 18:30 Concurrent Technical Sessions: FrE 1 to FrE 5

FrE 1 – Main Auditorium

Mini-symposium
Timber Construction (3): Modelling of the load bearing performance of timber structures
Chairman: K. Jochen

Failure studies carried out in Europe and a proposal for a standardized failure template
T. Toratti

Moisture-induced stresses in timber-concrete composite structures
M. Fagiacomo & J. Schänzlin

Stress analysis of timber structures under variable humidity conditions by using a multi-Fickian moisture transfer model
S. Fortino, T. Toratti & A.L. Mendicino

Robustness evaluation of timber structures – Results from EU COST Action E55:WG3
P.H. Kirkegaard, J.D. Sørensen, D. Čizmar & P. Dietrich

Robustness analysis of big span glulam truss structure
V. Raicic, D. Cizmar, P.H. Kirkegaard & J.D. Sørensen

Qualitative structural model for pre-evaluation of structures behavior
M. Oliveira & A.M.S. Freitas

Beware, she's here!
T. Andrade-Santos

Closing Ceremony (Main Auditorium)
18:30 – 19:00

FrE 2 – Room B1.14

The Borderline Between Architecture and Structural Engineering (2)
Chairman: Y. Weinand

The structure as an identity
R. Barakowski

Project management: integrating architecture and structural engineering design processes
N. Resende-Andrade, A.L. Aquiere & R.M. Lima

The work of Eduardo Torroja: Research for improving the quality of construction technology
J. Antuña

Structural skins in contemporary architecture
A. Bernabeu-Larena & J. Bernabeu-Larena

Robustness evaluation of timber structures – Results from EU COST Action E55:WG3
P.H. Kirkegaard, J.D. Sørensen, D. Čizmar & P. Dietrich

Utilization of triaxial stress fields in plastic shear solutions for confined RC members
L.C. Hoang & U.G. Jensen

Qualitative structural model for pre-evaluation of structures behavior
M. Oliveira & A.M.S. Freitas

Management of bridges with historical value
H. Isohata

FrE 3 – Room B1.15

Concrete Structures (3)
Chairman: M. Bostenaru Dan

Accounting for the construction phase in the coordination between architectural and structural design
M. Branco, M.R. Arruda & L. Murtreira

Reducing the embodied energy and embodied carbon of reinforced concrete structures in Ireland
J. Goggins

Directionally oriented fibrous structures for lightweight concrete elements reinforcement
P. Pina-Marques, R. Fangueiro & C. Goncalho-Pereira

Utilization of triaxial stress fields in plastic shear solutions for confined RC members
L.C. Hoang & U.G. Jensen

Strengthening of pre-stressed concrete main girder bridge by means of FRP plates
A.Q. Melhem

FrE 4 – Room B1.16

The History of the Relationship Between Architects and Structural Engineers
Chairman: A. Tavares

The history of the relationship between architects and structural engineers
M.R. Taghavi

Félix Candela (1910-1997): Architect and structural engineer
P.Cassimello

The changing concept of truss design caused by the influence of science
M. Rinke & T. Kotnik

Past and present characteristics of Vierendeel's poutre à arcades
K. Verswijver & R. de Meyer

AVI as a mechanical tool for studying dynamic and static beam structures
F. Demoures, T.S. Ratiu, Y. Weinand & J. Nembrini

Management of bridges with historical value
H. Isohata

FrE 5 – Room B1.17

Experimental and Numerical Analysis
Chairman: J. Pinto

Prediction of debris hazardous zone for different architectural and structural forms
S.C. Fan & Q.J. Yu

Experimental results on composite steel-concrete structural shear walls with steel encased profiles
D. Dan, V. Stoian & A. Fabian

Experimental investigation of panel zone in steel beam-to-column joint at elevated temperature
M. Strejcek & F. Wald

Experimental analysis on T-shaped metallic profile for timber connection
A. Polastri, M. Moretton, R. Tomasi, M. Piazza & A. Angeli

15:00 – 19:00 20:00	Registration (Lobby of the Main Auditorium) Welcome Reception (Alberto Sampaio Museum - Guimarães)
------------------------	---

Wednesday, July 21, 2010

9:00- 9:30 9:30 – 10:30 11:00 – 13:00	Opening Ceremony (Main Auditorium) Keynote Lectures (Main Auditorium) WeM 1 Mini-symposium “Tectonics” in Architecture: Between Aesthetics and Ethics (1): The arena
14:30 – 16:30	WeA 1 Mini-symposium “Tectonics” in Architecture: Between Aesthetics and Ethics (2): The heritage of the past
17:00 – 19:00	WeE 1 Mini-symposium “Tectonics” in Architecture: Between Aesthetics and Ethics (3): Theoretical issues and ideas for future developments

Thursday, July 22, 2010

8:30 – 10:00 10:30 – 12:30 10:30 – 13:30 14:00 – 16:00 15:00 – 16:00 16:30 – 18:30 20:00	Keynote Lectures (Main Auditorium) ThM 1 Special Seminar Megastuctures: Architecture_Play_Structure (1) ThA 1 Special Seminar Megastuctures: Architecture_Play_Structure (1) ThE 1 Special Seminar Megastuctures: Architecture_Play_Structure (2) Gala Dinner (Municipal Stadium - Braga)
11:00 – 13:00	WeM 2 Mini-symposium Transparent Structural Materials - Glass and Plastic (1): Glass
14:30 – 16:30	WeA 2 Mini-symposium Transparent Structural Materials - Glass and Plastic (2): Plastic
17:00 – 19:00	WeE 2 Mini-symposium Transparent Structural Materials - Glass and Plastic (3): Hybrids
19:00 – 21:00	FrM 1 Mini-symposium Timber Construction (1): Tall Timber Buildings
21:00 – 23:00	FrA 1 Mini-symposium Timber Construction (2): Cross Laminated Timber-A New Design Principle
23:00 – 00:00	FrE 1 Mini-symposium Timber Construction (3): Modelling of the load bearing performance of timber structures
00:00 – 02:00	FrM 2 Special Structures
02:00 – 04:00	FrA 2 The Borderline Between Architecture and Structural Engineering (1)
04:00 – 06:00	FrE 2 The Borderline Between Architecture and Structural Engineering (2)
06:00 – 08:00	FrM 3 Concrete Structures (1)
08:00 – 10:00	FrA 3 Concrete Structures (2)
10:00 – 12:00	FrE 3 Concrete Structures (3)
12:00 – 14:00	FrM 4 Computer and Digital Design Tools (1)
14:00 – 16:00	FrA 4 Computer and Digital Design Tools (2)
16:00 – 18:00	FrE 4 The History of the Relationship Between Architects and Structural Engineers
18:00 – 20:00	FrM 5 Masonry Structures (1)
20:00 – 22:00	FrA 5 New Materials
22:00 – 24:00	FrE 5 Experimental and Numerical Analysis

Conference Venue – Main auditorium, rooms for parallel sessions and exhibition hall

Welcome reception at Alberto Sampaio Museum
